

COLOUR CODED ORIENTEERING EVENT

BEVERLEY WESTWOOD

Sunday 23rd September 2001

Organiser's Comments

Ken Hutson

The short term impact of F & M on our sport is clear for everyone to see however, as yet, we do not know how many have found permanent alternatives to Orienteering and may never return. Under normal circumstances I would have been very disappointed with 140 competitors at this Westwood event but, the difficulties encountered with publicity may have had a significant effect on numbers taking part.

I hope all those who did take part enjoyed their runs and were spurred on by the reasonably firm terrain and the absence of cow-pats!

My sincere thanks go to all the HALO members for their expert help on the day. With such quality and expertise available my role was more co-ordinator than organiser. A special 'thank you' to Mike and Christine Cope, not only for their help on the day but also for their support in the weeks prior to the event.

Planner's Comments

Kim Dent-Brown

Westwood presents a number of problems. Can I find a radically new way of sending White runners round Burton Bushes? Are there any points of navigational interest in the same area for the harder courses? Is it possible to find enough controls with enough technical difficulty to keep all the Blue runners interested? Can we avoid annoying the golfers? (The answer in every case is of course no.)

This was my first event as planner, so thanks everyone for putting up with my efforts. I was fairly happy on the whole, though with hindsight I wish I had reversed the Blue 2 course so that you were not repeating similar legs second time round. I hope no-one on Red or Light Green was unduly put off by the control near the bridge magically changing its number. I put the kite out at 8am and by 8.30 it had gone! Fortunately it was our only loss.

Many thanks to Mike Cope for controlling on the day, John Butler for guiding me through the rest of the process up to that point and

John Chaney for setting me on the right path as a fledgling planner. Thanks Mike, Neil, and Brian for collecting controls and special mention to Max Guscott for help on the day above and beyond the call of duty!
